

NOTICE OF PESTICIDE APPLICATION

Herbicide Name(s): Tri-Fol

EPA Reg. Number: 81927-78

Active Ingredient: Calcium Chloride, Citric Acid

Target Pest: Weeds in traffic median

Area to Be Treated: Traffic medians in Sir Francis Drake Blvd, Eliseo Drive to College Ave

Application Dates: January 19, 2026

Signal Word: None

Re-Entry Period: When Dry

NOTE: This product is a pH buffer, designed to ensure that any water mixed with herbicides has the proper levels of acidity, to ensure effectiveness. Because Marin County has generally hard water, it is anticipated that this product may be needed. However, the amount of product needed will depend on the pH levels of the water tested that day.

In accordance with Marin County Ordinance No.3598, Section 23.19.160 Pesticides are applied in accordance with State and Federal regulations. No applications are made to turf areas, designated play areas or picnic table areas. This project is for the purpose of maintaining traffic visibility and reducing the total amount of time spent in a busy traffic zone. Spraying is being done once, in conjunction with many hours of non-chemical work such as hand-weeding, weed-whipping, and mulching. For further questions, please contact Kat Knecht, Senior Program Coordinator, at 415-720-6755 or Kat.Knecht@marincounty.gov
